

Find Awesome Content to Share on Social Media and Help Moderate Comments

Project Title	Find Awesome Content to Share on Social Media and Help Moderate Comments
Project Summary	We love sharing amazing stories about Veterans and Veteran-centric programs. Come help our social media team find amazing stories to highlight for our more than 1 Million followers on Facebook and other social channels. You'll also help us enforce our comments policy.
Country	United States

Project Description

Our team manages the main social media channels for the entire Department of Veterans Affairs. We want to share stories about our nation's amazing Veterans and you can help us find them. In this internship, you will be responsible for scouring the Internet to find great stories about Veterans, Veteran-centric programs, and even the VA itself that we can share. With your help, we can highlight stories that might otherwise have gone unnoticed.

Additionally, we sometimes get comments on our posts that require some action on our part. These include vulgar comments or slurs, SPAM, personally identifiable information (i.e. social security number) and unfortunately even threats against other people or oneself. You can help us find these comments and deal with them.

To see a complete listing of our social channels, visit: <https://www.va.gov/opa/socialmedia.asp> . Our team manages the Department-level channels listed at the top of the page. We look forward to working with you!
